

Please do not allow LPFM stations to take over current FM translator services. K-LOVE radio in my region is on 100.1 FM and is a great service to the local community, providing family radio free of commercials and providing value-based music and news. The loss of this radio would mean the people of the local areas where these stations are located would not be able to listen to this programming as they spend time going to and from work each day (and as kids are going to and from school). The radio programming K-LOVE provides is an alternative to the poor programming currently running on other commercial stations and the K-LOVE network is good for families and the public interest. Thank you.
